

Breeze 3: Taiwan-Focused AI for Everyone.

MediaTek Research builds AI models for Traditional Chinese users. Breeze 3 enables Taiwanese Hokkien understanding and speech, enhances communication, and strengthens digital safety in a localized ecosystem.

SPEECH RECOGNITION

Breeze ASR

Whisper-class Taiwanese Hokkien speech recognition. Sub-second inference on local GPU with BFloat16 precision.

CONTENT SAFETY

Breeze Guard

Traditional Chinese safety classifier covering scam, health misinfo, political manipulation, and more. 6 safety categories.

SPEECH SYNTHESIS

Breeze TTS

Natural Taiwanese Hokkien text-to-speech powered by CozyVoice v2 architecture. High-fidelity voice generation. *Available via API; not open-sourced.

ASR & GUARD WEIGHTS

- Runs entirely on local GPU — no cloud dependency, no data leaks
- Single HTTP endpoint — POST audio, get JSON transcription
- torch.compile graph caching for sub-second warm inference
- Optimized for Taiwanese Hokkien (台語) with native cultural context
- Taiwan Safety Benchmark (TSBench) for localized content moderation
- Open-source model weights (ASR & Guard) and technical reports on ArXiv
